Timeless luxury yachts

Monte Carlo Yachts is a pioneering project in the Yachting World that breaks new ground. Genuinely Italian in its management, designers and artisanal skills, supported by the industrial strengths of Groupe Beneteau - worldwide market leader for boats with international production capabilities and global sales networks - Monte Carlo Yachts is dedicated to crafting timeless luxury yachts.

In value we trust

The value of time, style and elegance. The value of space, responsibility and well-being. The value of the individual. These are values that represent Monte Carlo Yachts' core vision, a special way of interpreting the world, sailing, luxury and our relationship with the ocean.

Harmony

We believe that the most beautiful things possess harmonious balance between form and function, performance and aesthetics.

Harmony is at the centre of everything we do, and the whole must always be greater than the sum of its parts.

People first

We create unique yachts and experiences, and we build around the needs and desires of our customers. MCY offers a personal relationship that makes people feel good.

At Monte Carlo Yachts we are as passionate and motivated as our clients.

Pioneering attitude

Doing things differently is not always easy but it is necessary; the best ideas come from exploiting new opportunities driven by a clear vision. At Monte Carlo Yachts we approach tasks with a pioneering attitude that, when applied with pragmatism, precision and creative flair, can overcome any perceived limit to take us beyond the expected.

Reliability

At Monte Carlo Yachts we are totally committed to you. It's not just something we say, it's something we do every day. Open, human interaction can make all the difference, and you can count on us to be honest, reliable and more than willing to go the extra mile.

The fleet

Elegant yachts with a distinctive style combined with harmonious lines and enriched by sophisticated materials and contemporary decorative touches: the MCY Collection stands out for its unique features.

The level of maturity achieved by Monte Carlo Yachts is clearly expressed through wide internal spaces, impressive panoramic views, engineering solutions that have reached new levels of achievement, and design ideas that have been tailored to offer owners well-being and comfort.

Classic distinction

The MCY yachts are thought, designed and built to stand the test of time and go beyond trends and fads that come and go. We recognize that new standards of luxury are constantly being established and that responsibility, sustainability and personality are increasingly important. We rise to the challenge of building each and every one of our motor yachts to be the best expression of luxury today and tomorrow. Our yachts are elegant but never overstated, innovative but noble: they are timeless classics.

Discover MCY's
revolutionary naval
architecture and unique
production process

Leading technology

At Monte Carlo Yachts we understand that there is no form without function, and no function without form. For a yacht to be beautiful, it also needs to come from technological excellence. Inspired by Lean Manufacturing concepts derived from the most advanced industrial sectors, Monte Carlo Yachts manufacturing process constitutes an extraordinarily innovative approach in the yachting sector. We pursue aesthetic quality and unmatched technical reliability whilst achieving high levels of productive efficiency.

This revolutionary approach has received an Industrial Design Association award in recognition of our research in technology and construction.

Innovation in a
Production Process

Naval Architecture and Production Process

Monte Carlo Yachts has gone above and beyond its truly iconic design and remarkable customization capabilities by introducing revolutionary naval architecture and a unique construction process.

MCY yachts are made of three modules - hull, interior module and deck - which are built simultaneously until the last detailing stage then joined together during final assembly.

The truly innovative element is represented by the interior module, which is built in its entirety as a single piece outside of the hull. In addition the traditional hull structure is replaced by an innovative internal structural skeleton so that the entire beam of the yacht contributes to increase the structural qualities.

GRP components and infusion process

All fiberglass components of every MCY yacht are meticulously manufactured using engineered core materials and resin applied by vacuum infusion. This choice provides a better work environment thanks to a drastic reduction in the levels of air emissions, whilst also reducing the yacht's weight through the optimization of the impregnation ratios of the composite.

Almost unique in the sector, all fiberglass major components used receive a special post-curing treatment before going to the assembly line, guaranteeing the best mechanical and physical properties further to elimination of residual emissions. This procedure is performed inside the company's state-of-the-art painting facility, which works also as a high temperature oven.

Bespoke attention

Every one of our models is unique, and it couldn't be any different, because it is built around the dreams of its owner. We design and build MCY yachts through a close collaboration with the owner creating an exclusive experience and relationship that lasts in the long-run.

At Monte Carlo Yachts, we deliver truly unique yachts born from bespoke personal experience and attention to the smallest details.

Tailored yachts

What may come to a surprise at first is discovering that Monte Carlo Yachts builds fiberglass yachts where virtually every inch of space is custom-designed and hand-made. Customization options range from the main deck, lower deck and exterior areas, all aiming to offer exceptional enjoyment and liveability. Leveraging technology both within the design and manufacturing process, the MCY Collection offers limitless possibilities to satisfy any owner's special requirements.

All materials used in the yachts' living spaces come from the world's top design firms and the best Italian suppliers. The aim is to combine selected natural stones and woods, hand-made tiles, decorative metals, high end fabrics and hand-stitched leathers in a balanced and refined way.

MCY 66

Making room for light

The main ally of the yacht's design is the natural light, which outlines and enhances the internal lines and environments of the MCY 66 with awe-inspiring results. The yacht's many living areas are designed to be enjoyed through a direct relationship between the inside and the outside, providing linear connections within the spaces and open views on the horizon.

Moreover the essential and sophisticated contemporary decor contributes, in all its limitless customization alternatives, to amplify the natural lighting and the overall onboard volumes.

Come onboard
and explore
the MCY 66

An uniquely private area to relax in and enjoy the breeze while overlooking the ocean and embracing that sense of freedom that only the sea can offer

The innovative design of the high V-shaped hull guarantees safe and stable cruising while also ensuring a dry and comfortable bow area

Protected by a large openable carbon fiber T-top, the flybridge features best-in-class surface dimensions with a wide range of customizable options

Focus on breathtaking landscapes;
the distinctive design of the bulkheads
and the well protected sideways safely
connect the bow to the stern

The attention to the design of liveable exterior areas is reaffirmed by the presence of a wide shaded aft cockpit easily connected to the full beam aft platform

The entire design is focused on blurring the boundaries between inside and outside areas by offering direct access and a close connection with the sea

Comfortable and functional distribution onboard is one of the leading principles in the layout configuration, having direct access to the lower deck and the sideways next to the main helm station

The owner cabin is conceived as a best in class private suite flooded by natural light and amplified by reflective surfaces and mirror placements

Openable windows at the bow increase the brightness of the VIP cabin featuring warm decorative and the sophisticated furniture finishing

Natural light spreads throughout all cabins and their bathrooms, creating a harmonious atmosphere, which distinguishes the entire lower deck

MCY 66 details

Tailored glossy outer coat paint options can be chosen from an almost limitless palette, highlighting the importance of the customization options in the interior areas as well as on the external lines

Hand-made stitching and accurate finishings enhance the attention to detail present in all the yacht's different cabins and components

The double berth crew cabin and the dedicated bathroom are easily accessible through the engine room thanks to the full headroom and the rational layout

MCY 66

A bright atmosphere

Through all the exterior and interior spaces described, the volume and liveable areas are sensibly increased thanks to essential and functional layout and design solutions that are focused on enhancing the comfort onboard.

The different enjoyable areas are connected and amplified by the presence of natural light in order to optimize the use of the large volumes available and to provide the best experience onboard.
